-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3617

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-5, 8-15, 18-21, 25, and 28 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Livingston (cited by Applicant). Livingston discloses the claimed boat and method of manufacturing a boat including a hull of glass fiber reinforced resin (column 2, lines 20-25), a first portion of a stringer of foam 21 and a second portion of a stringer of relatively high strength 23 (wood) (note Figure 4, for example). The stringer has a cross piece 22 and a nose at the forward end and the stringer has fiberglass cloth extended over it (note column 3, lines 10-55, for example).

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 6, 7, 16, 17, 22-24, 26 and 27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Livingston (cited by Applicant) in view of Goad et al. Livingston does not disclose the second stringer member to be of high density foam. Goad et al teach a stringer of high density foam (note column 6, lines 43-45). It would have been obvious to a person of ordinary skill in the art at the time the invention was made to form

the second stringer portion of Livingston to be of high density foam as taught by Goad et al for high strength.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Blaisdell et al show a hull.
